

BRAND & MARKETING GUIDE · 2026

Eat smart. Train smarter.

Everything you need to present Calgym: the logo, colours, type, voice, features, plans and ready-made copy, in English and Arabic.

كُلْ بذكاء، وتمزّن بذكاء أكبر.

A flame, a C and a dumbbell

Energy (the flame), Calgym (the C) and training (the dumbbell) in one mark. Use the original on light backgrounds, white on photos and colour, black or purple when printing in one colour.

Black

#111111

White

Purple mark

Using the logo well

Do

- Leave clear space around the logo at least the height of the dumbbell's end plates.
- Minimum size: mark 16 px / 5 mm high; horizontal logo 90 px / 25 mm wide.
- Original logo on white or the light background #F5F3FA; white logo on the gradient, purple, black or photos.
- Arabic material uses the Arabic lockup (كالجيم); the mark sits on the right.
- Use the files as supplied: SVG for print and web, PNG for social and documents.

Don't

- Stretch, rotate, outline or add shadows and effects.
- Recolour the mark with colours outside this guide.
- Put the original gradient logo on a busy photo.
- Rebuild the wordmark in another font.

Mark, white

Mark, purple

Mark, black

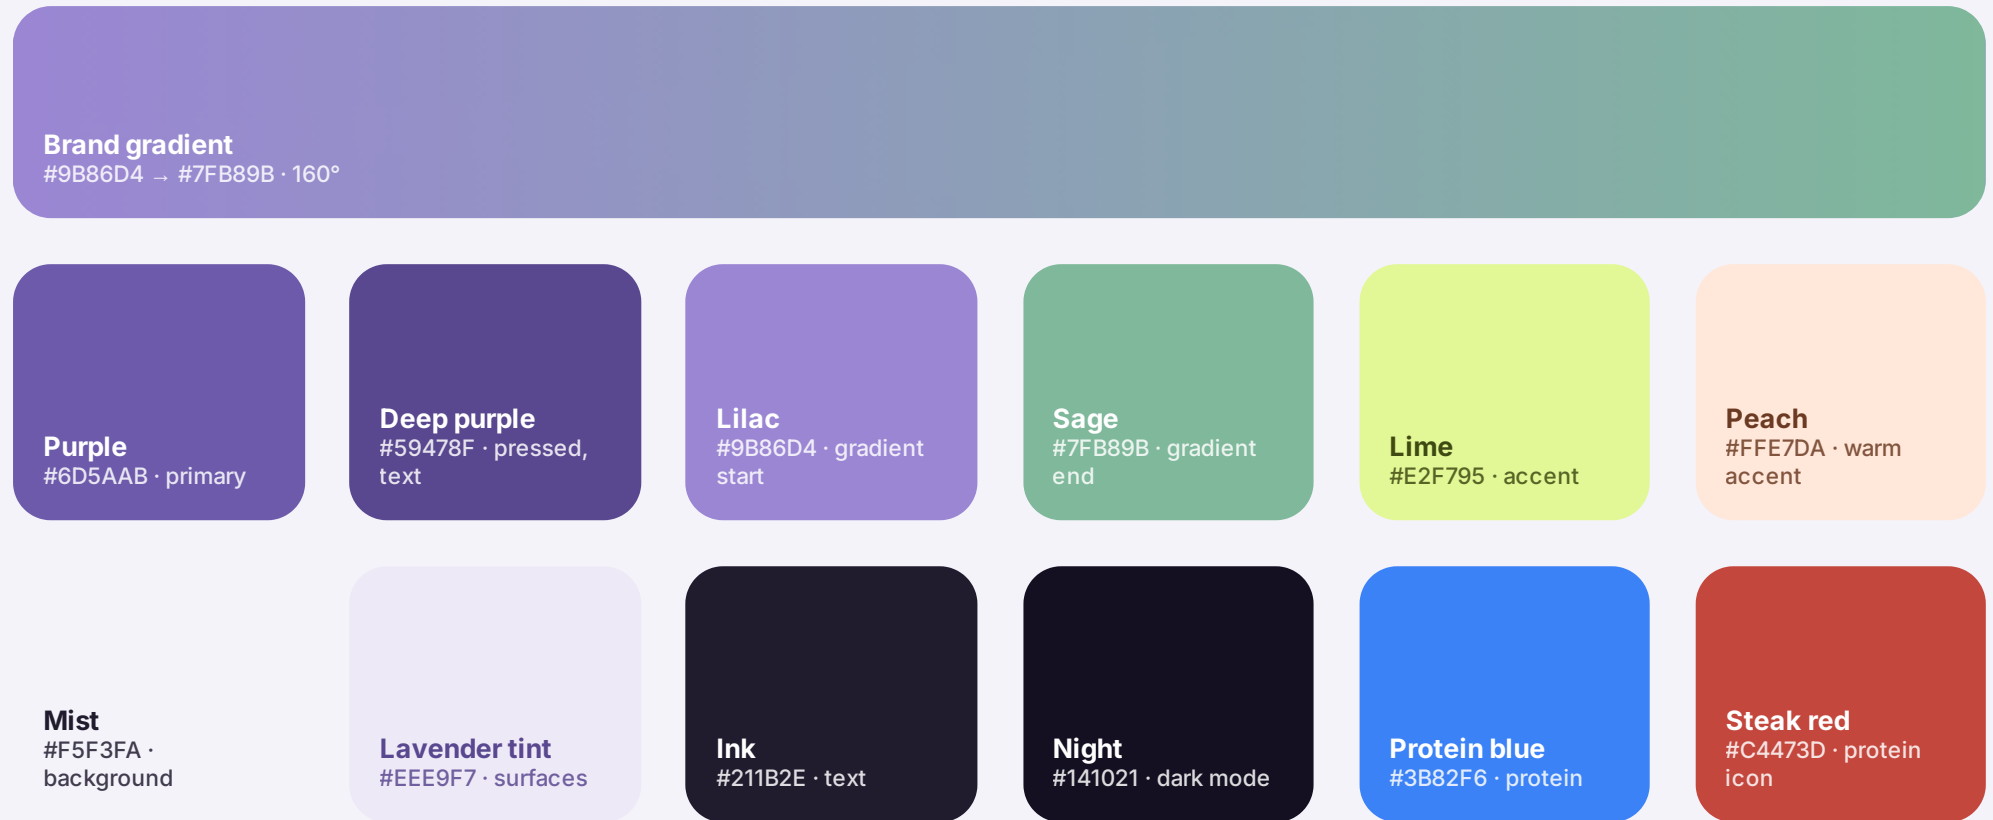

Calgym

Stacked logo, for square spaces

Calm purple, fresh green

60% light neutral background, 30% dark text and surfaces, 10% brand colour for buttons, key numbers and highlights. The gradient carries the brand on covers, headers and big moments.

Clear, warm, confident

Typefaces

Inter ExtraBold

Headlines. Tight letter-spacing (−2%). SF Pro in the iPhone app.

Inter Medium: body text and captions.

IBM Plex Sans Arabic

Arabic headlines (Bold) and text (Medium). SF Arabic in the iPhone app. Arabic never shrinks below the English size.

All fonts are free (SIL Open Font License): fonts.google.com.

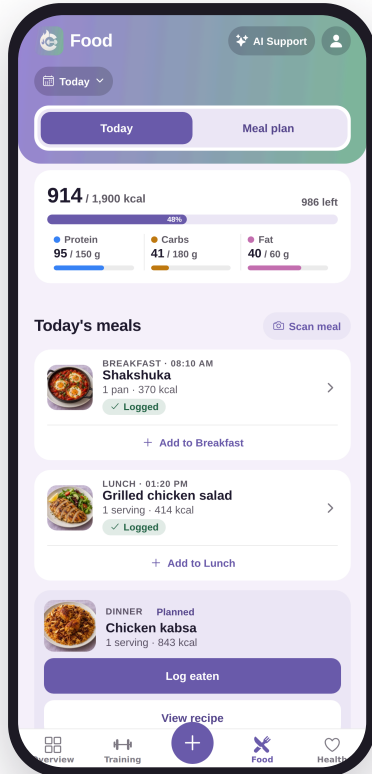

How Calgym talks

- **Like a good coach:** encouraging, never preachy. "Let's make today count", not "You failed your goal".
- **Plain words:** "calories and protein", not "macronutrient optimisation".
- **Honest:** AI numbers are "estimates you can review". Unknowns are never shown as zero.
- **Short:** one idea per sentence; headlines under 7 words.
- **Arabic is written, not translated:** natural Gulf-friendly Modern Standard Arabic.

Never claim

Exact or 100% accurate calories · medical diagnosis or treatment · "lose X kg in Y days" · guaranteed results · "free" without "14-day trial".

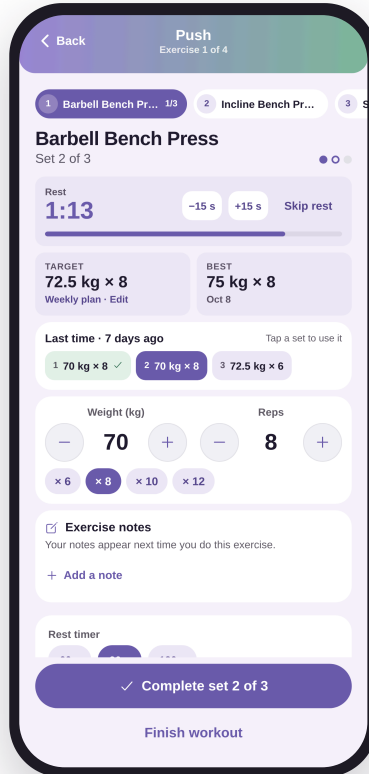

Four pillars

Snap it, know it

Photo, description or barcode: estimated calories and macros in seconds.

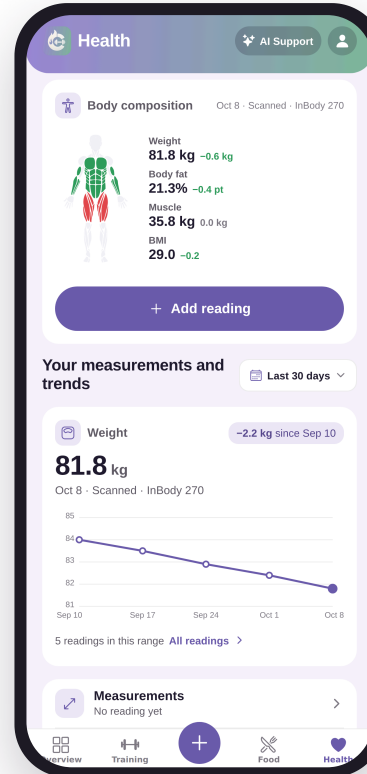

صوّر واعرف

Train with a plan

Weekly schedule, last sets in view, lock-screen rest timer.

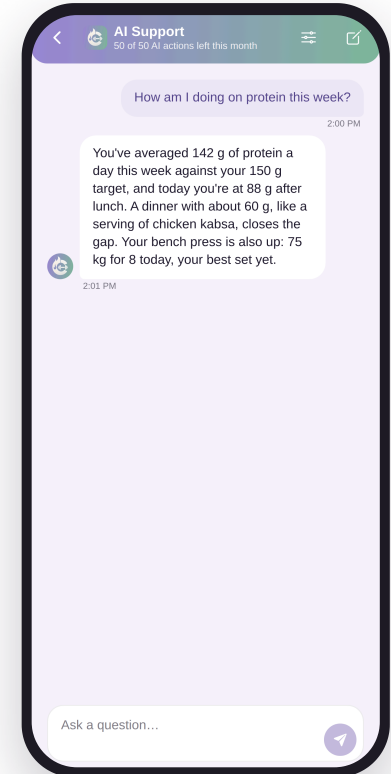

تمرّن بخطة

See your progress

Weight and body composition, records, PDF report.

شاهد تقدّمك

A coach that knows you

Answers from the data you choose to share.

مدرب يعرفك

Everything in the app

Food

- Snap a meal
- Describe a meal
- Barcode scan
- Label reading
- Recipes
- Serving scaling
- Weekly meal plan
- Shopping list
- Fasting tracker
- Ramadan reminders

Training

- Weekly schedule
- Saved schedules
- Last sets in view
- Rest timer ± 15 s
- Lock screen & Dynamic Island
- Move a missed workout
- Machine scan
- Records
- Body map
- AI program builder

Health

- Weight
- Measurements
- Water
- InBody / Tanita / DEXA reports
- Body composition
- WHOOP
- PDF report
- Data export

AI coach & more

- Ask anything
- Uses your data
- Prepares log entries
- Coach memory (Pro)
- Smart reminders
- Daily recap
- Guest mode
- Apple / Google sign-in
- Cloud backup
- Dark mode
- Arabic & English
